

VERIFIED MASTER EVIDENCE INDEX

MCSO Case 2026-00010128 | Provenance-audited universal source set

Evidence rule

Folders 01-09 contain only verified source files. Folder 90 contains neutral secondary navigation/reproduction material only. **No recipient-specific outreach packet is included in this master set.**

01 - Core incident record

2026-10128.pdf - original MCSO report attachment received from Calandra Elliott on Aug. 14, 2026.

02 - Agency video and audit

SavannahBenally_202607160714_BWC2006218-0[REDACTED].v1.mp4 and

SavannahBenally_202607160713_27852G-1[REDACTED].v1.mp4 - original MCSO productions received Aug. 21, 2026. **WG Audit Log.pdf** - original MCSO production.

03 - CAD, 911 and dispatch

26-10128.pdf - original MCMDA CAD attachment. **26_10128.zip** - preserved dispatch archive. The CDR and WAV beside it are exact extracted members of that ZIP.

06 - DA referral and status

DA report log_case review form.pdf - original MCSO-produced attachment. **DA_Call_Recording.m4a** - original user-created call recording; it is not agency-authored.

90 - Neutral guides and reproductions

Contains only neutral secondary aids: Bittony auto-transcript and timestamp key, identity note, command-review/public-source references, and the NMDOJ IPRA correspondence compilation. Tailored outreach packets are stored separately and are not part of this evidence ZIP.

Native sources not embedded

The command-review email, MCSO/IPRA email thread, DPS oversight email, and legislative-response emails remain native Gmail records. Their message IDs are listed in **00 EXTERNAL AND NATIVE SOURCE LOCATORS.txt**.

Full Bittony bodycam

The external Drive file is a working complete-playback copy reconstructed from sequential MCSO-produced segments without re-encoding, not a native single-file agency original. It is not embedded because its size exceeds the connected-file download limit.

Integrity

See **00 PROVENANCE AND SHA256.csv** for classification, provenance note, byte size, and SHA-256 hash.
